

Our project @ **Ty Dyffryn, Rhyl** with **Sika Sarnafil**

Sika Sarnafil single ply with Standing Seam effect to a new block of apartments including all roofline and rainwater goods.

Project Details...

Cartrefi Conwy gave the go ahead on a new development in Rhyl, North Wales for new affordable housing for local people in Rhyl. This £2.6million scheme consists of 18, 2 bedroom, 3 person apartments for social housing tenants. Weatherwell were chosen to install a standing seam effect roof by main contractor NWPS.

Following a change in specification by the client we were asked to suggest a system for his project with a single ply system that would give the effect of a standing seam roof. With the help and expertise of the team at Sika Sarnafil a system was designed and approved quickly. With various roof levels and bespoke details our team carried out a great installation that was passed for warranty by the field technician on his first visit. We also carried out all of the perimeter fascia, gutters and soffits.

- 18mm OSB 3 Timber Deck
