

Our project @ **Borras Juniors School** with **Sika – Sikabit Pro**

Sika Sikabit Pro Bituminous roofing system and ancillaries at Borras Park Junior School in Wrexham, North Wales.

Project Details...

A design and build project carried out by Read Construction to build new extensions and refurbish the existing building. We were lucky to be awarded the roof refurbishment package on this project, utilising Sika UK's Sikabit Bituminous system. Works carried out all to Safe2torch guidelines.

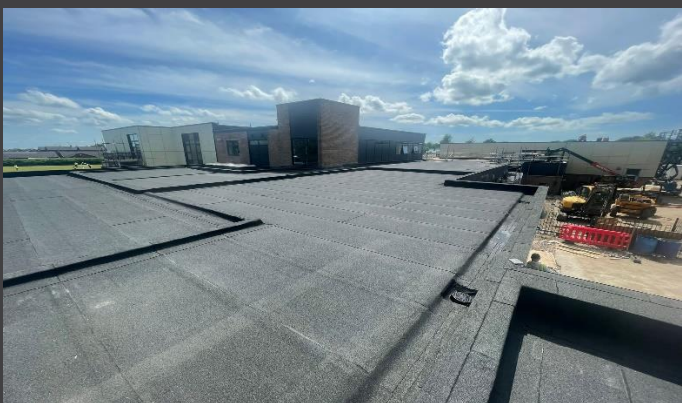

Following a specification request by Wrexham Council, Sika carried out a full survey of the existing roofs, and subsequently we were chosen to carry out this project. The project has a variety of roofs, all with different insulation thickness and levels, many bespoke details were carried out to a high standard as well as the installation of new rooflights and walkways. Being a bituminous membrane then safe2torch guidelines were followed where self adhesive products were used.

- Refurbishment Project
- Various roof levels and details
- Insulation thickness varied between areas.
- Sika Sikabit Bituminous Membranes
- New Velux & Sika Rooflights
- Project completed within programme, with no issues to report.
- 25 Year Sika Warranty on completion

Client - Wrexham Borough Council

Date - Feb 2022
